CS 2750 Machine Learning

Learning mixture of experts Gradient learning. On-line update rule for parameters $\boldsymbol{\theta}_i$ of expert *i* – If we know the expert that is responsible for \mathbf{x} $\theta_{ij} \leftarrow \theta_{ij} + \alpha_{ij} (y - \mu_i) x_j$ – If we do not know the expert $\theta_{ij} \leftarrow \theta_{ij} + \alpha_{ij} h_i (y - \mu_i) x_j$ h_i - **responsibility of the** *i***th expert** = a kind of posterior $h_i(\mathbf{x}, y) = \frac{g_i(\mathbf{x}) p(y | \mathbf{x}, \omega_i, \mathbf{\theta})}{\sum\limits_{u=1}^k g_u(\mathbf{x}) p(y | \mathbf{x}, \omega_u, \mathbf{\theta})} = \frac{g_i(\mathbf{x}) \exp(-1/2 \|y - \mu_i\|^2)}{\sum\limits_{u=1}^k g_u(\mathbf{x}) \exp(-1/2 \|y - \mu_u\|^2)}$ $g_i(\mathbf{x})$ - a prior $\exp(...)$ - a likelihood CS 2750 Machine Learning

Learning mixtures of experts

Gradient methods

On-line learning of gating network parameters η,

 $\eta_{ij} \leftarrow \eta_{ij} + \beta_{ij} (h_i(\mathbf{x}, y) - g_i(\mathbf{x})) x_j$

- The learning with conditioned mixtures can be extended to learning of parameters of an **arbitrary expert network**
 - e.g. logistic regression, multilayer neural network

$$\theta_{ij} \leftarrow \theta_{ij} + \beta_{ij} \frac{\partial l}{\partial \theta_{ij}}$$
$$\frac{\partial l}{\partial \theta_{ij}} = \frac{\partial l}{\partial \mu_i} \frac{\partial \mu_i}{\partial \theta_{ij}} = h_i \frac{\partial \mu_i}{\partial \theta_{ij}}$$

<section-header><section-header><text><text><text><text><text><text><equation-block><equation-block><equation-block>

On-line learning

- Assume linear experts $\mu_{uv} = \mathbf{\theta}_{uv}^{T} \mathbf{x}$
- Gradients (vector form):

 $\frac{\partial l}{\partial \boldsymbol{\theta}_{uv}} = h_u h_{v|u} (y - \mu_{uv}) \mathbf{x}$ $\frac{\partial l}{\partial \boldsymbol{\eta}} = (h_u - g_u) \mathbf{x} \qquad \text{Top level (root) node}$ $\frac{\partial l}{\partial \boldsymbol{\xi}} = h_u (h_{v|u} - g_{v|u}) \mathbf{x} \qquad \text{Second level node}$

• Again: can it can be extended to different expert networks
