IC Card Management System Copyright © 2007 University of Pittsburgh. [Valid XHTML](#), [Valid CSS](#).

Add "decompose card" button that leads to php codes to guide the user to decompose this card into two or more cards.

Add "transform card" button that leads to php codes to guide the user to transform this card into one or more card under certain conditions.

Common Steps:

- Step 1: Copy the php codes
- Step 2: Install php server and SQL server on your own PC
- Step 3: Modify existing php codes so that you have a screen like above
- Step 4: Each of you then work on your php codes to perform the decomposition and transformation
- Step 5: Integration and Testing and documentation (revise user manual)
