

IPSN 2008: Call for Demos

The International Conference on Information Processing in Sensor Networks (IPSN/SPOTS 2008)
Sponsored by ACM and IEEE
St. Louis, Missouri, USA
April 22 - 24, 2008
[IPSN 2008](#)

CALL FOR DEMOS

The International Conference on Information Processing in Sensor Networks (IPSN 2008) draws upon many disciplines including networking, signal and image processing, information and coding theory, databases, embedded systems, wireless communications, and machine learning. In addition to full-length technical papers, IPSN is very interested in demonstrations of novel sensor network technology, applications, and hardware. The IPSN Program Committee encourages both academic and industrial submissions. The demo section does not distinguish between the main IPSN tracks and the SPOTS track, both areas of interest are welcome.

DEMO SUBMISSION INSTRUCTIONS

Accepted demos will be included in the IPSN proceedings if submitted by the "regular submission" deadline below. Submissions should be sent to [ipsn2008demos AT gmail.com](mailto:ipsn2008demos@gmail.com). The content should be a two-page abstract that follows the IPSN formatting guidelines, please refer to the IPSN submission instructions for details. Be as specific as possible in describing what you will demonstrate. The demo session will have a table per demo, power and wireless connectivity available. If a demonstration requires special arrangements, please note them in the mail message with the submission (not in the submission itself).

IMPORTANT DATES

REGULAR SUBMISSION

Two-page demo descriptions: **February 1, 2008**

Notification of acceptance: **February 8, 2008**

LATE SUBMISSION - DEMO ABSTRACT WILL NOT APPEAR IN PROCEEDINGS

Two-page demo descriptions: **February 29, 2008**

Notification of acceptance: **March 14, 2008**

Conference dates: **April 22-24, 2008**

Thank you very much for your interest!
IPSN 2008 Demo Chair
Ralph Kling (Crossbow Technology)
